

Anandhu Krishnan

Calicut, Kerala, India

Phone: +91 9188009631 Email: anandhuuu789@gmail.com

Summary

Motivated Bachelor of Computer Applications (BCA) graduate with a strong interest in Cybersecurity and Ethical Hacking. Possesses hands-on experience in network and web application penetration testing using industry-standard security tools and practical lab environments. Passionate about continuous learning and exploring advanced areas of cybersecurity research, offensive security, and vulnerability assessment.

Technical Skills

Cybersecurity:	Network Penetration Testing, Web Application Penetration Testing, Vulnerability Assessment
Security Tools:	Nmap, Metasploit Framework, Burp Suite, SQLMap, Shodan, Google Dorking, Nuclei, Subfinder, httpx, Amass
Operating Systems:	Kali Linux, Windows
Programming:	Python, HTML, CSS, JavaScript
Security Research:	OWASP Top 10, Web Security Fundamentals, Basic Networking Concepts

Projects

CTF Lab 1 – [Obscura]

- Designed and developed a Capture The Flag (CTF) environment focused on web application exploitation and security assessment.
- Implemented realistic attack paths and vulnerability chains to simulate practical penetration testing scenarios.

CTF Lab 2 – [Hack20]

- Built a cybersecurity training lab featuring multiple stages of enumeration, exploitation, and privilege escalation concepts.
- Developed challenges aimed at improving practical cybersecurity skills and methodology.

College Web Application Project

- Developed a web application as part of the Bachelor of Computer Applications curriculum project.
- Participated in the design, development, and testing phases of the application lifecycle.

Achievements

- Successfully designed and built multiple cybersecurity CTF environments for educational purposes.
- Developed practical experience with offensive security methodologies and penetration testing workflows.
- Continuously engaged in hands-on cybersecurity labs and self-learning activities.

Education

Bachelor of Computer Applications (BCA) [Kannur University]

Certification

ECPT - Ehackify Certified Penetration Tester

Professional Development

- Pursuing continuous self-learning in Cybersecurity and Ethical Hacking.
- Developing practical skills in network and web application security assessment.
- Exploring advanced cybersecurity concepts through research and hands-on experimentation.

Languages

- Malayalam – Native Proficiency
- English – Fluent
- Tamil – Fluent
- Hindi – Intermediate
